Recertification

Recertification – What? Why?

What?

- Pioneer Boat AS has completed recertification on selected Pioneer models.
- We work close together with Ville Höglund at Nordic Marine Certification Society AB, a Hpi Sertification Services Ltd. representative.

Why?

- Because we wish to improve our range by expanding the possibilities for Pioneer boat owners and end users.
- To ensure that safety is maintained.
- To quality assure ourselves.
- As a quality stamp to customers and end users.

NOTE!

This is not something that we do because DNV chose to quit their work with certification work of recreational crafts. We don't have to do this, but we want to!

Recertification – Results

400 Steady

- Max no. of persons increased from 5 til 6 (cat. C).
- Max load 1005 kg (+ engine)

«Pros» and benefits

Safe and easy boating with Pioneer

MINIMAL MAINTAINANCE

Pioneer boats are able to deal with rough treatment and handling. They are user friendly and in need of minimal maintainance

LONGEVITY

Pioner boat hulls are rotational molded in one single piece, making them very tough, with few to none residual stresses. They are produced in high quality PE material containing UV-stabilizers. All this make the Pioneer boats highly capable of withstanding shocks and impacts, cold, high temperatures and sunlight.

STABILITY

The construction and design of the Pioner boats, make for a stable and sturdy, which provide high safety. With their double hull construction, they obtain great bouyancy and a smooth ride in the waters.

SAFETY

Pioner boats are certified and CE-marked in accordance with the Recreational craft EU Directive. All our boat models, as well as our production, are tested and supervised by a Notified Body as the third part. Combined with high professional competence, we are securing high quality boats!

DRAINAGE

Unique self-draining system.

COMFORT

No sharp egdes, comfy seatings, well though solutions, anti-skid surfaces. A Pioneer boat is a pleasant boat to take to the waters.

pioneer

Sustainability

Sustainability in practice

- Old Pioneer boats = new products
 - Plastic recycling and re-using recycled materials
 - All roto-moulded plastic parts mounted in Pioneer boats are produced out of 100% recycled materials
- Nordic Plastic Recycling – established in 2016
- Awarded best sustainability business 2025 in Aurskog-Høland area.
- Development of products suited for electrical propulsion
- Invested in new modern energy efficient factory and production equipment.

« Winner of the year combines innovation with a circular way of thinking, and has produced products based on recycled materials, establishing plastic recycling, and developed sturdy products with a clear view towards the future.»
- the jury stated.

Recyclable

From chopped up
to new products
